Computer Vision Engineer - For a technology-based BARCELONA (BARCELONA)Empresa: GRUP ORGANIGRAMADescripció: Organigrama SL: recursos humans, selecció de personal, formació empresarial, psicologia industrial. We are looking for a Computer Vision Engineer to provide technical leadership and hands-on development of our computer vision projects. This role will lead the charge for selecting and implementing the right technologies based on business requirements and best practices. We are located in Girona and we offer a position in this city. We have developed a new proprietary concept, a special Sensor. Now we want to extend the capabilities of our sensor with new exciting functionalities that will bring the technology to a new level of usability and open the door to new applications and markets. Algorithms will have to be implemented and optimized. We also expect the engineer to contribute to the exploration of additional research lines. Other important tasks: -Develop accurate computer vision algorithms and systems, - Design and implement advanced algorithms for reconstructing dense 3D models of large-scale indoor environments using sensors. - Analyse and improve efficiency, scalability, and stability of various deployed systems. Collaborate with team members from the level of prototyping to the level of production.Relació laboral: LABORAL INDEFINITNombre Hores: 0Salari mensual des de: 0Salari mensual fins a: 002/02/2018
