REMOTE 10 Java 8 Senior Software Engineer for crypBARCELONA (BARCELONA)Empresa: Nom d'empresa no visibleDescripció: IT headhunting and Human Development start-up born in Mexico that recruits top technology experts from all around the world for opportunities in Mexico City, Madrid and Bogotá, and even to be working remotely from own paradise (internet is required!) for awesome cryptocurrency and consultancy companies.Job Summary & Responsibilities You will be working in a cryptocurrency start-up company. You can be based in Mexico City or work remotely from anywhere in the world. Must: -10 or more years of experience developing in Java -VERY HIGH fluent English skills for having complex oral conversations -Willingness to work in a Java 8 environment with NO frameworks, in a highly concurrent system (1.000 transactions per second), doing 50% of the time testing, integrating exchange cryptocurrency platforms from many countries to the existing platform. Requirements The Senior Software Engineer will augment the existing engineering team in the ongoing development of our core platform. The Senior Software Engineer will be a key member of our team. Not only will he or she be responsible for contributing to the growth and further development of our software platforms but additionally identify areas of potential improvement; improvements that very well might have significant implications on the company's business model, overall direction, and mission. Additionally, this role will have significant influence on the growth of the engineering team, including hiring and firing. You will get to navigate the exciting challenges faced by the most essential component of a fast-growing and innovative company. Activities Extensive experience and knowledge of Java 8 as well as leading skills. Ninety-nine percent of our platform is written in Java 8, and so it's essential that you are good at Java 8 and have an extensive knowledge of its standard library.
